

/ Description

3-point rotating electric servomotor (modulating and bidirectional). It is installed on the mixing valve by means of a screw. Rotation angle 90°. The servomotor can also work manually by means of its switch. For the proper functioning and connection please refer to the instructions in the technical sheet.

/ Gamma

| Code | Voltage |
|-----------|------------|
| 82787BI53 | 230 volt |
| 82787BI54 | 24 volt AC |

/ Technical features

| Electric power supply: | 230V - 50Hz |
|--------------------------|---------------|
| Max current absorption: | 3,5 VA |
| Execution time on 90°: | 135 sec |
| Nominal load torque: | 10 Nm |
| Operating temperature: | -10/+50°C |
| Protection degree: | IP 40 |
| External shell material: | Polycarbonate |

Electrical connection
